INTELLIGENCE RESEARCH AID

The Intelligence Research Aid is a technical publication designed primarily for the use of substantive intelligence officers. The dissemination of this publication outside the Agency varies with the subject matter. Although Research Aids are normally self-initiated for internal use, the Statistical Handbook is widely used in the Government, both inside and outside the Intelligence Community, and is regularly revised and updated to meet the needs of its users. The current issue of the Statistical Handbook was sent to the following recipients outside the Agency:

National Indications Center  
National Security Agency  
United States Information Agency  
Defense Intelligence Agency  
Department of State  
Department of Commerce  
Department of the Interior  
The Office of Emergency Planning  
Agency for International Development  
White House Staff  
Office of the Secretary of Defense  
Department of Commerce, Bureau of the Budget  
Department of the Interior, Bureau of Mines  
Department of the Treasury  
Arms Control and Disarmament Agency  
Joint Chiefs of Staff

## FOREWORD

1. *Purpose and Scope*

The *Economic Intelligence Statistical Handbook*, 1965, provides reliable statistics on the economies of the Communist countries\* and of the countries of the North Atlantic Treaty Organization (NATO).\*\* Every effort has been made to review all pertinent sources, to provide the latest information possible, to make the data consistent and comparable, and to determine that the data are both accurate and meaningful.

The content and format of the *Handbook* have been revised to make possible more explicit and extensive economic comparisons. New tables have been added, and some tables of marginal interest in previous issues of the *Handbook* have been excluded. The tabular graphics, in which the data are presented in a combined table and chart, are designed for further possible use as visual aids. To facilitate locating all information on a subject, the table of contents has been organized to combine the listing of both graphic material and tables on the same subject. Footnotes have been used liberally throughout the *Handbook* to give definitions, exceptions, and methodology. An unclassified table of Selected Conversion Factors is included after the table of contents, and an index is in the back of the *Handbook*.

The data in the *Handbook* are presented for selected years in the period 1955-64, with plan

\* Including the USSR, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Rumania, Communist China, North Korea, North Vietnam, Albania, Cuba, Mongolia, and Yugoslavia.

\*\* Including the US, Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Turkey, the UK, and West Germany. Production data for the Saar before 1960 have been included in the NATO total; for 1960 and after, they have been included in the data for West Germany. Data for Alaska and Hawaii, when available, have been included in the total for the U.S.

data or estimates of plan data given for the Communist countries for 1965. A summary table is presented for each of the Communist countries, selected NATO countries, India, and Japan. The data for Mongolia, because of their scarcity, are presented in a summary table but are not included in the individual commodity or aggregative tables.

2. *Rounding of the Totals*

In each table the data for the individual countries have been rounded consistently to permit the maximum use of available information. Because of the limitations in the cumulative data, the totals have been rounded, with few exceptions, to three significant digits. In general, zeros appearing after the last nonzero number following the decimal point are not significant but are used merely for consistency in presentation.

Totals are not presented if missing data are believed to represent a significant part of the total. Data are not presented for countries in which little or no production takes place or for which a significant amount of the data are not available. Because of rounding, components may not add to the totals shown.

3. *Symbols*

In the tables the abbreviation N.A. (not available) is used when information about the existence of the data or the magnitude of the data is not available, and the abbreviation *Negl.* (negligible) is used when the magnitude of the data is less than half of the final unit employed for each table.

4. *Classification of Data*

The overall classification of the *Handbook* is SECRET. The unclassified data, indicated by an asterisk (\*), may be official data of the country cited or may be estimates of this Office.

SECRET

SECRET

5. *Sources*

The data given for the most recent years frequently are preliminary and subject to revision. The data for the Communist countries are estimates of this Office, official data from the country cited, or estimates made by other organizations. The data for the NATO countries are from pub-

lications of the United Nations and the Organization for Economic Cooperation and Development (OECD), from the official publications of other individual countries of the Free World, and from unclassified publications of the US Government.

## CONTENTS

### I. ECONOMIC INDICATORS

#### A. COMPARATIVE AGGREGATIVE DATA

<i>Table</i>		<i>Page</i>
1	Comparative Data on Gross National Product for the US and the USSR ( <i>Tabular Graphic</i> )	2
2	Gross National Product	3
3	Gross National Product, by End Use, for the US and the USSR	4
4	Absolute and Percentage Differences of Gross National Product for the US and the USSR ( <i>Tabular Graphic</i> )	5
5	Gross National Product for Selected NATO Countries	6
6	Annual Rates of Growth of Industrial Production in the US and the USSR ( <i>Tabular Graphic</i> )	7
7	Indexes of Industrial Production	8
8	Annual Rates of Growth in Industrial Production in Eastern Europe ( <i>Tabular Graphic</i> )	9
9	Selected Economic Data for the US and the USSR	10
10	Official Communist Indexes of Gross Industrial Production	11

#### B. SELECTED DATA FOR THE USSR

11	Distribution of Gross National Product, by End Use, for the USSR	12
12	Indexes of Industrial Production, by Branch of Industry, for the USSR	13
13	State Budget for the USSR	14
14	Gross Fixed Investment, by Function, Including Productive Gross Fixed Investment, by Sector, in the USSR	15
15	Annual Rates of Growth of Civilian and Military Goods in the USSR ( <i>Tabular Graphic</i> )	16
16	Comparison of Estimated Military Expenditures with the Announced Defense Budget of the USSR ( <i>Tabular Graphic</i> )	17
17	Annual Rates of Growth in Investment and Defense for the USSR ( <i>Tabular Graphic</i> )	18
18	Soviet Military Expenditures, Including Research and Development and Procurement for Advanced Weapons and Space Systems ( <i>Tabular Graphic</i> )	19
19	Estimated Expenditures for Defense by the USSR	20

<sup>a</sup> For the individual European NATO countries, the ratios for converting GNP in national currencies at 1963 prices into 1963 US\$ on the basis of US purchasing power equivalents are derived from the 1950 ratios given in Milton Gilbert and Associates, *Comparative National Products and Price Levels*, OEEC, Paris, 1958, using the geometric mean of European and US weighted ratios. These 1950 ratios were moved to 1963 by applying the following factor: the derived price indexes for each European country for 1950-63 divided by a derived price index for the US for 1950-63. These price indexes were derived for each country by dividing the growth of GNP in current prices by the growth of GNP in constant prices. The ratios thus obtained were applied to the GNP values, given in the national currencies in 1963 prices. The total GNP for the European NATO countries is based on the estimate that the total GNP of the individual countries shown represents 94.6 percent of the total European NATO GNP, which is the relationship given in estimates prepared by the Department of State. The values shown for the Communist countries have been calculated in a manner which makes them reasonably comparable with the values shown for the NATO countries.

<sup>b</sup> The base year is 1958. Percentages were derived from unrounded data.

<sup>c</sup> Preliminary.

<sup>d</sup> Including data for the Saar and West Berlin. The data for West Germany for 1960, excluding the Saar and West Berlin, is 1963 US\$ 89.9 billion.

Table 3  
 Gross National Product, by End Use, for the US and the USSR  
 1963

Administration . . . . .	23.4*	19.5	83.4
GNP . . . . .	<b>583.9*</b>	<b>283.6<sup>c</sup></b>	48.6

<sup>a</sup> An asterisk indicates that the data are unclassified.

<sup>a</sup> US market prices. Total Soviet gross national product (GNP) and the various end uses were converted to dollars not by the official rate of exchange but by the average purchasing power ratio of the dollar and the ruble calculated from actual or estimated prices paid for various goods and services in the two economies. For GNP as a whole and for each end use component of GNP, these average ratios (ruble-dollar ratios) were estimated by weighting individual price ratios by both US and Soviet expenditure weights. The geometric mean of the US weighted and Soviet weighted ratios was then used for the conversion of Soviet values into dollars.

The magnitudes for the Soviet end use components were calculated to measure quantity of output compared with the US but not the cost in resources. The share of total economic resources devoted to a particular end use or the share of total output originating in an individual sector (for example, agriculture or industry) in the USSR should be measured in internal ruble prices and costs. Agriculture, for example, alone uses 44 percent of the civilian labor force, or 49 million people, as a result of the inefficiency of that sector in the USSR.

The adjusted end use component parts of GNP are defined as follows:

1. Consumption equals personal expenditures for goods and services for all purposes except education and noninvestment outlays by government for goods and services for health. (The unadjusted data for the US is \$375.0 billion.)

2. Investment is defined (a) for both the US and the USSR as the sum of expenditures for gross private domestic investment, less investment in education facilities; for public construction other than that for education and defense facilities; for equipment purchased by the government except that for education and defense; for defense stockpiling and defense-production expansion; for net exports of goods and services; and for net military grants to foreign countries and (b) for the US, as also including expenditures by state and local government for development of atomic energy. (The unadjusted data for the US is \$82.0 billion.)

3. Defense as a component of GNP includes government purchases of goods and services for the military services, federal government expenditures on atomic energy development, and outlays on space research and technology. Defense excludes stockpiling activities, net military grants for foreign military assistance, and government sales. (The unadjusted data for the US is \$57.9 billion.)

4. Education includes private and public expenditures on goods and services for education both for current use and for investment purposes. (The unadjusted data for the US is \$23.4 billion.)

5. Administration as a component of GNP is the residual left after all current expenditures for national defense, health, and education and all capital expenditures are subtracted from government purchases of goods and services. (There is no equivalent category for the unadjusted data for the US.)

<sup>b</sup> Based on unrounded data.

<sup>c</sup> The sum of the end use components of Soviet GNP, valued in dollars, does not equal the dollar value of aggregate GNP, because of the use of average ruble-dollar ratios in converting from ruble values to dollar values. Nevertheless, the individual end use components were not adjusted to agree with the total, since the US-USSR comparisons shown are believed to give the best available description of relative size.

<sup>a</sup> This series for gross national product (GNP) is an acceptable series insofar as comparability in the monetary units of the individual countries is concerned. The series is inadequate, however, for international comparisons based on the conversion of GNP into a single currency using the various rates of exchange. Such international comparisons (based on rates of exchange) are of doubtful value because the rates do not adequately indicate relative purchasing power. The more correct series for comparison of GNP is to be found in Table 2, p. 3. The following current rates of exchange are presented for the purpose of conversion of the data into US dollars when no international comparison is to be made.

	Monetary Unit per US \$1
Belgium.....	Franc.....

<sup>a</sup> Indexes for the NATO countries are value-added weighted indexes of intermediate and final products of industry. Industry includes manufacturing and mining and, in most countries, public utilities. Data for Belgium, France, Italy, Luxembourg, the Netherlands, the UK, and West Germany exclude the manufacture of food, beverages, and tobacco. The indexes for the Communist countries are estimates of this Office—constructed as nearly as possible on the same basis as the indexes for Western countries—or other calculations accepted by this Office. The indexes for the Communist countries include manufacturing, mining, and public utilities.

<sup>b</sup> The base year is 1958.

<sup>c</sup> Unadjusted for working days.

<sup>d</sup> Excluding data for the Saar.

<sup>e</sup> Index of gross values for individual commodities and branches aggregated by 1955 value-added weights. The three sectors covered—materials, machinery, and consumer goods—comprise 44.3 percent, 34.2 percent, and 21.5 percent, respectively, of the value-added weights for industrial production. This index is as comparable as data will permit with the index of industrial production of the US Federal Reserve Board.

<sup>f</sup> Estimates of this Office computed by applying value-added weights to data for commodity production. The data, particularly for years after 1959, are fragmentary and uncertain. Therefore the index should be regarded as providing only a tentative indication of the general level and trend in production during 1960-64.

<sup>a</sup> These indexes are measures of the "gross" value of production of industry at constant prices. The gross value of production is, in general, the sum of the value of output of all industrial enterprises. The definition of industry in Communist countries includes not only manufacturing, mining, and public utilities as in most Western definitions of industry but also certain other activities (varying from country to country).

<sup>b</sup> The base year is 1958.

<sup>c</sup> Revised plan for 1965, announced on 9 December 1964.

<sup>d</sup> An increase of 15 percent was announced for 1964.

<sup>e</sup> A planned increase of 11 percent was announced for 1965.

SECRET

Table 11

<sup>a</sup> Because of the well-known difficulties in using Soviet prices as a measure of resource burden, the shares of GNP in this table are based on GNP at factor cost. In calculating GNP at factor cost, 1955 end use weights have been revised from a market price basis to a factor cost basis by subtracting turnover taxes and adding amortization charges, implicit interest costs, agricultural land rent, and subsidies. These revised weights are then moved over time by indexes of the value of the various end uses in constant market prices.

<sup>a</sup> These estimates of Soviet defense expenditures include costs of nuclear weapons, costs of space programs, and costs of military research and development, most of which are covered in announced Soviet budget accounts other than defense. Most of the estimates in this table are derived from detailed calculations of the estimated magnitude and cost of individual programs to deploy and operate elements of the Soviet military establishment. These calculations produce numbers that suggest a high degree of accuracy. In fact, however, these numbers are subject to considerable uncertainty and should not be considered as precise measures. The estimates, however, are as accurate and as comprehensive as the data available on 1 May 1965 permitted. If these estimates are to be used for further analysis of a definitive nature, this Office should be contacted to determine whether they have been supplemented or revised in any manner by additional intelligence information.

<sup>b</sup> Expressed in 1955 prices.

<sup>c</sup> Including estimated expenditures for research, development, test, and evaluation for all military programs, all nuclear energy programs, and all space programs. These estimates are derived from analysis of published Soviet financial data and do not represent detailed calculations of the estimated magnitude and cost of individual programs.

<sup>d</sup> Including estimated expenditures for reserve training, militarized security forces, and paramilitary training, in addition to command and support for the active military establishment.

<sup>a</sup> Excluding the armed forces.

<sup>b</sup> Annual averages of monthly data. Data in this table are for civilian employment and differ from those presented in Table 140 p 152. Data in Table 140 are for farm employment and include farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages. Data in Table 140 are based on a survey of farm payrolls conducted by the US Department of Agriculture. Data for the agricultural labor force are based on a household survey of the entire population conducted by the US Bureau of Census. Data in Table 140 are a more comprehensive count of agricultural employment and are considered to be more comparable to data presented for the USSR, whereas data in this table are considered to be more comparable to data presented for the Communist countries as a whole.

<sup>c</sup> Excluding militarized security forces.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Official statistics of the countries listed, except where data are estimated. Exports and imports are f.o.b. except for Hungary, Cuba, and Yugoslavia, where imports are c.i.f.

<sup>b</sup> Including trade of the Communist countries with Cuba.

<sup>c</sup> Estimated data.

<sup>d</sup> Some trade also is carried on between North Korea and the Free World. Total trade of North Korea with the Free World in 1963 amounted to about US \$20 million. The breakdown of total trade into exports and imports is not available.

<sup>e</sup> Rounded to the nearest US \$5 million.

<sup>f</sup> Based on data of trading partner countries.

<sup>g</sup> Not applicable. Cuba was not a Communist country before 1960.

<sup>h</sup> Excluding US ransom payment of US \$13 million.

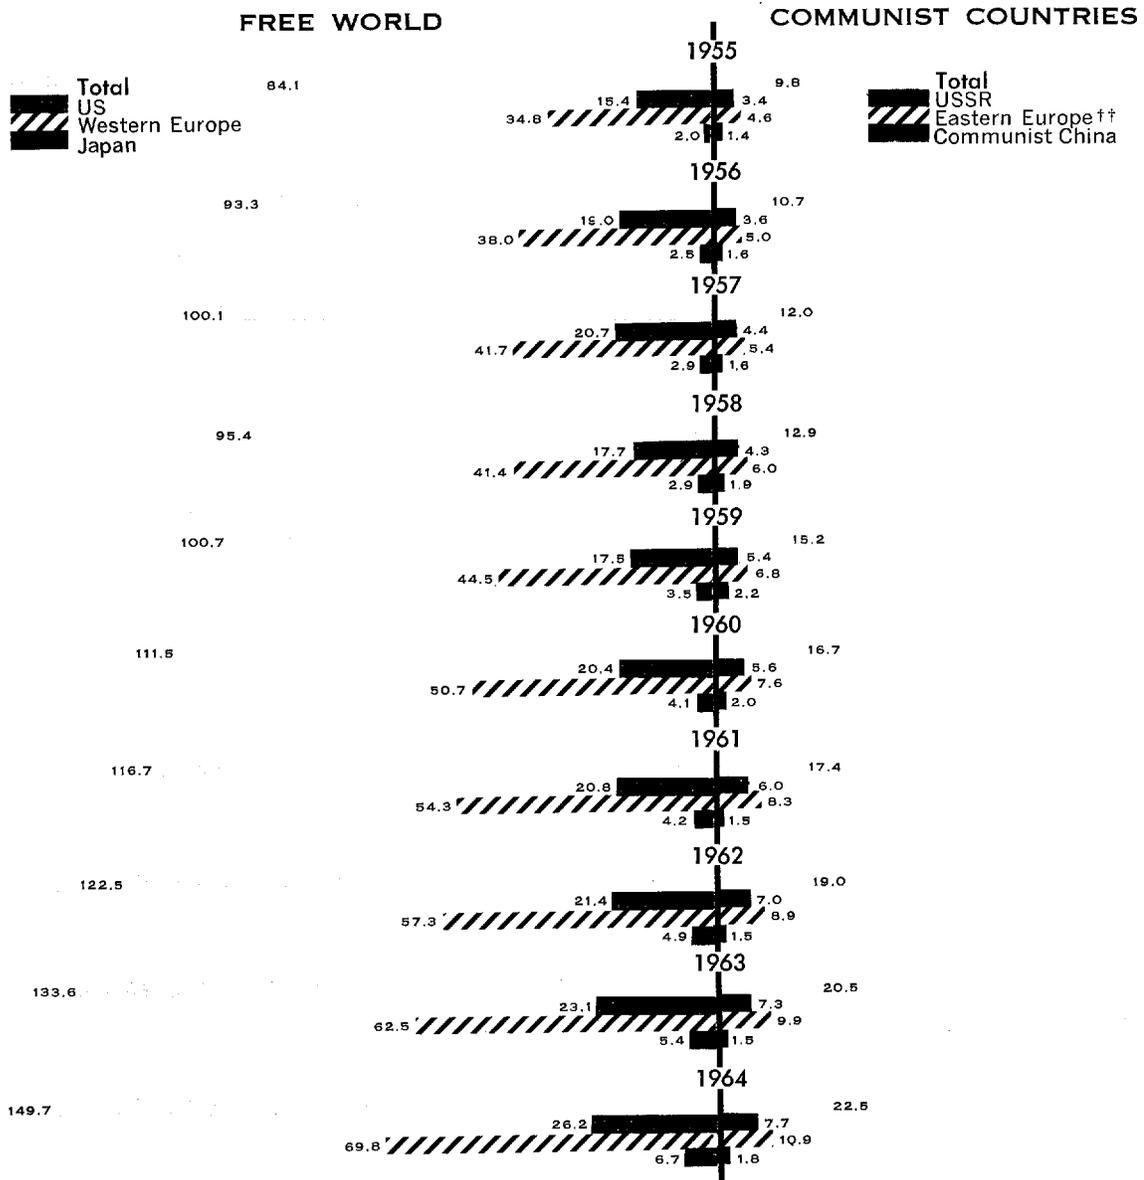

<sup>i</sup> Excluding US ransom payment of US \$50 million.

\* An asterisk indicates that the data are unclassified.

\* Data for exports of total petroleum, crude oil, and petroleum products and for exports to the Communist countries are official Soviet statistics. Data for the Free World are derived as residuals and include exports for which the importing country is not specified. Therefore, the values in this table will differ slightly from the sum of the data from Table 56, p. 69 and Table 58, p. 71. Cuba is included in the Free World in 1958-59 and in the Communist countries in 1960-64.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Official rates unless otherwise indicated. These rates are used for converting trade statistics.

<sup>b</sup> Rates used for noncommercial transactions such as diplomatic, tourist and student expenditures, personal remittances, and the like. Some countries have special rates for tourists in addition to the noncommercial rate.

<sup>o</sup> The unofficial rates actually used in East German accounting of foreign trade transactions. Official rates still listed, but not used, are 2.22 DME to US \$1 and 2.47 DME to 1 ruble.

<sup>d</sup> Generally accepted conversion rates, with the rate of 2.46 being used in trade with the Free World and the rate of 4.0 in trade with the Communist countries. Because official rates have never been announced by Communist China, these conversion rates have been estimated and, therefore, represent only approximations of actual rates.

<sup>e</sup> An approximate rate. Actual rates vary depending on the transaction involved and the currency being traded. Actual rates also appear to change from time to time.

<sup>f</sup> A bank rate. North Korea has not announced an official relationship between the won and Free World currencies. This rate probably is used for noncommercial transactions.

<sup>g</sup> A bank rate. North Vietnam has not announced an official relationship between the dong and Free World currencies. This rate probably is used for noncommercial transactions.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> The total area of the country and, unless otherwise indicated, including bodies of inland water.

<sup>b</sup> Arable land includes land planted to crops (with double-cropped areas being counted only once); land temporarily fallow; temporary meadows for mowing or pasture; garden land; land under fruit trees, vines, and fruit-bearing shrubs; and rubber plantations.

<sup>c</sup> One hectare equals 2.471 acres. Data are for various years during the period 1957-64.

<sup>d</sup> Land area only.

<sup>e</sup> Total agricultural area.

<sup>f</sup> Including land belonging to agricultural holdings exceeding 0.405 hectare (1 acre).

<sup>g</sup> Continental sector only.

<sup>h</sup> Including data for the whole of Kashmir.

<sup>i</sup> Including data for the Balearic and Canary Islands.

<sup>j</sup> Official Soviet data (22,402,200 square kilometers) include the White Sea (90,000 square kilometers) and the Sea of Azov (40,000 square kilometers), which are excluded by definition from the data shown.

<sup>k</sup> Including only plowland and lands formerly cultivated but now idle.

1964 . . . .	64.22*	6.27*	+1.37*	71.86*	8.64*	80.50*	475.5*	169*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> The years refer to the crop years—that is, the year ending 30 June of the last year of the 2 years stated.

<sup>b</sup> Data refer to cleaned rice, jowar, bajra, corn, ragi, small millets, wheat, and barley. Production data relate to harvests mostly completed within the stated calendar years and have been reduced by 12.5 percent to eliminate amounts used for feed seed and waste. Therefore, these data differ from those presented in Table 26, p. 30.

<sup>c</sup> A minus sign indicates amounts reserved for stocks; a plus sign indicates additions to net availability from stocks.

<sup>d</sup> Including data for Sikkim and Kashmir-Jammu. Midyear population is used because crop production in India occurs at a different period than most other Northern Hemisphere countries.

Table 74

Net Agricultural Production and Availability of Grain in the USSR  
1958-64

Index of Net Agricultural Production						1958=100
1958	1959	1960	1961	1962	1963	1964
100*	96*	96*	105*	103*	98*	109*

Production and Availability of Grain					
Million Metric Tons					
Year	Production <sup>a</sup>	Net Trade <sup>b</sup>	Total Availability <sup>c</sup>	Million Persons at Year's End <sup>d</sup>	Availability per Capita <sup>e</sup> (Kilograms)
1958.....	125*	-3.9*	121*	209*	579*
1959.....	100*	-6.2*	94*	212*	443*
1960.....	100*	-6.1*	94*	216*	435*
1961.....	115*	-6.8*	108*	220*	491*
1962.....	115*	-7.4*	108*	223*	484*
1963.....	95*	+1.8*	97*	226*	429*
1964.....	125*	N.A.	125* <sup>e</sup>	229*	546* <sup>e</sup>

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Including immature ears of corn converted to a mature grain equivalent.

<sup>b</sup> The effect of a metric ton of grain imported for food is much greater on the food situation than the effect of an additional ton of domestic production, which is reduced approximately 15 percent for feed, seed, and waste. A minus sign indicates net exports; a plus sign indicates net retained imports.

<sup>c</sup> Including nonfood as well as food use.

<sup>d</sup> Year-end population is used because production in the calendar year is consumed in the last half of the year in which it is produced and the first half of the following year.

<sup>e</sup> Excluding trade.

Table 75

Production and Availability of Grain in Communist China  
1958-64

Million Metric Tons					
Year	Production <sup>a</sup>	Net Trade <sup>b</sup>	Total Availability <sup>c</sup>	Million Persons at Year's End <sup>d</sup>	Availability per Capita <sup>e</sup> (Kilograms)

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data include rough, or paddy, rice. Crop production statistics for the Northern Hemisphere relate generally to the harvests of the spring, summer, and autumn of the year stated, but for the more southerly regions of this hemisphere they relate to harvests continuing into the early part of the following year. For the Southern Hemisphere these data relate to crops generally harvested in the latter part of the year stated and the first half of the following year.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Data are for 1963.

<sup>d</sup> Estimated from planted acreage.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data refer to beet sugar produced in the calendar year. Data are given in terms of the raw value of centrifugal sugar. Refined sugar is equal to approximately 90 percent of raw sugar by weight. Centrifugal, as distinguished from noncentrifugal, sugar includes cane and beet sugar produced by the centrifugal process and is the principal type of sugar moving in international trade.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Including cane sugar.

<sup>d</sup> Including the refining of raw cane imports.

<sup>e</sup> Midpoint of the range of production of sugar from sugar beets planned for 1965 of 9.25 million to 10.0 million metric tons. Before 1960, almost all sugar was produced from sugar beets.

<sup>f</sup> Cane sugar only.

<sup>g</sup> Data are for the sugar crop year—that is, the year beginning 1 May of the stated year.

<sup>h</sup> Including data for Luxembourg.

<sup>i</sup> Data are for the Azores and Madeira only.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Including, where produced, nitrogen fertilizers (in terms of nitrogen), phosphorous fertilizers (in terms of phosphoric anhydride), and potassium fertilizers (in terms of potassium oxide).

<sup>b</sup> Estimated plan for 1965.

<sup>c</sup> The years for the NATO data are "fertilizer years"—that is, in general, the year beginning 1 July of the stated year.

<sup>d</sup> Excluding nitrogen fertilizers.

<sup>e</sup> Data are for 1961/62 and are included in the NATO total for 1962.

SECRET

MINERAL FERTILIZER  
PLASTICS

Table 98

Production of Mineral Fertilizer for the US and the USSR  
1958-64 and 1965 Plan  
(In Terms of Soviet Statistical Reporting Units <sup>a</sup>)

	Thousand Metric Tons							
	1958	1959	1960	1961	1962	1963	1964	1965 Plan
US <sup>b</sup> .....	30,305*	31,609*	32,320*	35,106*	38,719*	44,235*	49,546*	
USSR.....	12,419*	12,916*	13,867*	15,322*	17,258*	19,935*	25,600*	33,500*

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> For statistical purposes, Soviet production of fertilizers is usually reported as follows: nitrogen fertilizers are computed on the basis of fertilizers containing 20.5 percent nitrogen, potassium fertilizers on the basis of 41.6 percent potassium oxide, and most phosphorus fertilizers on the basis of 18.7 percent phosphorus pentoxide. In addition, total production includes an insignificant quantity of microfertilizers.

<sup>b</sup> Data are based on US production given in pure nutrients and recomputed to conform to the Soviet method for expressing production. The years for US data represent "fertilizer years"—that is, the year beginning 1 July of the stated year.

Table 99

Production of Plastics for the US and the USSR <sup>a</sup>  
1958-64 and 1965 Plan

USSR.....	258*	293*	332*	404*	473*	589*	720*	920* <sup>c</sup>

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Because of differences in definition and product mix, Soviet and US data on plastics are not strictly comparable. For the overall category of plastics, however, there is enough similarity to permit broad comparisons.

<sup>b</sup> Dry basis, excluding water, solvents, and other liquid diluents. Data have been revised to include some products previously excluded and, therefore, differ somewhat from the previous *Handbook*.

<sup>c</sup> Revised plan for 1965. The original plan was for about 1.8 million metric tons.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data refer to production of primary energy from major sources of supply, including coal, crude oil, natural gas, and hydroelectric power and exclude energy from minor sources such as peat, shale, and fuelwood.

<sup>b</sup> Energy expressed in coal equivalents has a calorific value of 7,000 kilocalories per kilogram.

<sup>c</sup> The following coefficients were used to convert the sources of primary energy into standard fuel equivalents: coal (metric tons), 1.0; brown coal and lignite (metric tons), 0.29; crude oil (metric tons), 1.3; crude natural gasoline (metric tons), 1.5; natural gas (1,000 cubic meters), 1.33; and hydroelectricity (1,000 kilowatt-hours), 0.55.

<sup>d</sup> Estimated plan for 1965.

<sup>e</sup> Including data for Luxembourg.

<sup>f</sup> Including data for the Saar.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries." Data for NATO relate, as far as possible, to natural gas (net production) actually collected and utilized as fuel or raw material. They thus exclude gas used for repressuring, as well as gas flared, vented, or otherwise wasted, whether or not it has first been processed for the extraction of natural gasoline.

<sup>b</sup> Data for the US are in terms of net marketed production and agree with the general definition for the NATO data. Data for the USSR are believed to refer to gross production less losses and waste. US gross production (less losses and waste) which would include gas returned to reservoirs in order to maintain horizon pressure (about 11 percent of gross production in 1963) would be as follows (billion cubic meters):

	1958	1959	1960	1961	1962	1963
	354	387	411	423	442	470

A much smaller share of total production in the USSR is believed to be used for repressuring.

<sup>c</sup> Data for the Communist countries are for gross production.

<sup>d</sup> Revised plan for 1965. The original plan was for 149.8 billion cubic meters.

<sup>e</sup> Including methane (dry) gas and wet gas from oilfields.

<sup>f</sup> Including data related to West Berlin, for which separate data are not available.

<sup>g</sup> Including gas used for repressuring and wasted.

<sup>h</sup> Data are for 1963.

Japan.....	85.41* <sup>f</sup>	174.30*							

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data include total (gross) production at generating centers and therefore include transmission losses and station use. (See footnote b, below.)

<sup>b</sup> Data are gross production or estimates of gross production based on reported net, adjusted by increasing by 7.53 percent the thermal electric production to include production that is consumed by the station itself. Hydroelectric production that is consumed by the station itself is a negligible part of the total gross production. Therefore, no attempt has been made to adjust the net production for hydroelectric power.

<sup>c</sup> Revised plan for 1965.

<sup>d</sup> Estimated plan for 1965.

<sup>e</sup> Before 1960, excluding data for the Saar.

<sup>f</sup> Data are for the year beginning 1 April of the stated year.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for steam and hydraulic turbines. Most production of turbines is for use in matched sets with generators for production of electric power. In addition, turbines are produced in single units for many purposes, including direct industrial drives, marine propulsion, and pipeline transmission.

<sup>b</sup> Shipments of units 4,000 kilowatts and larger. Data are available only for turbines produced as integral units together with generators. Therefore, data for turbines and generators for the US are assumed to be the same. Some turbines are produced in single units but no data are available on this production.

<sup>c</sup> Including a small number of gas turbines.

<sup>d</sup> Midpoint of the range of production planned for 1965 of 18.7 million to 20.4 million kilowatts.

<sup>e</sup> Steam turbines only.

<sup>f</sup> Steam turbines of more than 500 kilowatts only.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for the gross amount of marketable iron ores in the state in which they leave the mines, including manganese ores but excluding pyrites.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries." The metal content of the ore in the NATO countries and other Free World countries is as follows: Austria, Luxembourg, and the UK, 27 to 31 percent; Belgium, France, and West Germany, 31 to 34 percent; Greece, Italy, Portugal, Spain, and the US, 47 to 50 percent; Canada and Japan, 55 percent; Sweden and Turkey, 60 to 61 percent; and India, Norway, and Venezuela, 57 to 62 percent. The metal content of iron ore in Denmark is not available.

<sup>c</sup> Excluding manganese iron ore containing 5 percent or more of manganese.

<sup>d</sup> The metal content of the ore in selected Communist countries is as follows: USSR, in terms of dressed ore, 55 percent of the ore; Communist China, 20 to 50 percent; North Korea, 40 to 50 percent; Albania, 50 to 55 percent (1 percent nickel); Bulgaria, 38 to 50 percent; Czechoslovakia, 34 percent; East Germany, 25 to 30 percent; Hungary, 24 to 28 percent; Poland, 30 percent; Rumania, 32 to 40 percent; Yugoslavia, 40 percent; and North Vietnam, 55 percent.

<sup>e</sup> Revised plan for 1965.

<sup>f</sup> Plan.

<sup>g</sup> Iron-nickel ore that is mined for its nickel content.

<sup>h</sup> Shipments.

<sup>i</sup> Data are for 1963 and are included in the NATO total for 1964.

<sup>j</sup> Unless otherwise indicated, data exclude titaniferous ores and are for concentrates only.

<sup>k</sup> Including titaniferous ores.

<sup>l</sup> Excluding certain grades.

<sup>m</sup> Merchant ores and concentrates.

<sup>n</sup> Including data related to West Berlin, for which separate data are not available.

<sup>o</sup> Including iron sand and pyrites.

<sup>p</sup> Including concentrates.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data are for electrolytic and distilled (including redistilled) zinc produced from domestic and imported ores and scrap and other secondary materials.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Including production from secondary smelters. Production of primary zinc in the US was as follows (in metric tons): 1958, 708,700; 1959, 724,500; 1960, 725,300; 1961, 768,200; 1962, 797,800; 1963, 809,700; and 1964, 888,000.

<sup>d</sup> Primary metal only, representing slightly less than 80 percent of total production. For example, total production in 1964 was estimated to be 555,000 metric tons.

<sup>e</sup> Estimated plan for 1965.

<sup>f</sup> Revised plan for 1965.

<sup>g</sup> Annual production consists of zinc produced from scrap except for 100 to 200 metric tons before 1962, 6,100 metric tons in 1962, 6,100 metric tons in 1963, 9,000 metric tons in 1964, and 16,000 metric tons estimated for 1965.

<sup>h</sup> Estimated production for 1965.

<sup>a</sup> Service to the subscriber is a two-way service in which a subscriber is provided with a teletype machine connected to the switchboard of a local subscriber telegraph exchange.

<sup>b</sup> In the US the domestic subscriber telegraph network usually is known as both TWX and TELEX. The data differ from the previous *Handbook* because they now include small independent stations, which previously were excluded.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Including power-driven machine tools defined as not supported in the hands of an operator when in use and designed to remove metal in the form of chips, and also including honing, lapping, grinding, electroerosion, and ultrasonic cutting machines.

<sup>b</sup> Midpoint of the range of production planned for 1965 of 190,000 to 200,000 units.

<sup>c</sup> Including table drilling machines. The exclusion of these machines would result in the following series: for 1960, 5,886 units; for 1961, 6,479 units; for 1962, 6,213 units; for 1963, 5,500 units; and for 1964, 6,470 units.

<sup>d</sup> Including metalforming types that are estimated to be about 10 percent of the reported total.

<sup>e</sup> Production reported by official sources are as follows: for 1958, 50,000 units; for 1959, 70,000 units; for 1960, 90,000 units; and plan for 1962, 60,000 to 65,000 units. Data appear to include many rudimentary types not reported before 1958.

Table 150

Production of Metalforming Machine Tools in the US and the USSR <sup>a</sup>  
 1958-64 and 1965 Plan

	Thousand Units

USSR.....	26.2*	29.3*	29.9*	30.5*	33.4*	34.2*	34.2*	36.2* <sup>c</sup>

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Including power-driven metalforming machine tools defined as not supported in the hands of an operator when in use and designed to press, forge, emboss, hammer, extrude, blank, spin, shear, and bend metal into shape.

<sup>b</sup> Excluding manually operated bending and forming machines, spinning lathes, and riveting, can-making, diecasting, wire-weaving, wiredrawing, knurling, and marking machines, which normally are included in the definition of metalforming machine tools by the US Department of Commerce.

<sup>c</sup> In 1961 a new plan was drawn up that placed production at 55,000 units in 1965. Since that time, however, the USSR has reverted to the original plan of 36,200 units in 1965.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Because of the difficulty of determining valid rates of exchange, data are not presented in terms of a common currency. Official parity rates should be used with caution because they have been established and maintained arbitrarily and do not necessarily reflect the true ratio for construction. For example, the estimated ruble-dollar ratio for construction in the USSR in 1955 prices is about 0.70 new ruble to US \$1.

<sup>b</sup> Including the state sector, private housing construction, and construction-installation work performed by collective farms (excluding fishing artels).

<sup>c</sup> Expressed in 1955 prices.

<sup>d</sup> Value of state construction.

<sup>e</sup> Deutsche Mark East (East German marks).

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Including the total housing space, which includes living rooms, bedrooms, dining area, and auxiliary space such as bathrooms, kitchens, closets, and inside hallways.

<sup>b</sup> Data are computed from the number of housing starts during the given years. Strictly speaking, therefore, the data on completions are more accurate for interyear comparisons than for any given year. Housing starts were converted to total floorspace by converting to square meters on the basis of varying sizes of structures.

<sup>o</sup> Including 67.4 million square meters of urban housing and 20.1 million square meters of rural housing.

<sup>d</sup> Urban housing only.

<sup>e</sup> Estimated average yearly construction based on announced performance for several years.

<sup>f</sup> Official North Korean data for housing construction reported as 6.13 million square meters.

Greece <sup>i</sup> .....	0.36*	0.46*						

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Unless otherwise indicated, data refer to net metric ton-kilometers and include all goods and livestock carried during the calendar year by trains other than plantation, industrial, forest, mining, funicular and cable railroads but exclude service traffic, mail, and non-revenue government stores. Data include domestic, import, export, and transit freight traffic. Freight traffic carried on more than one railroad line within a country is counted only once. Foreign trade freight traffic carried through more than one country, however, is counted in each country. Data for the US specifically include revenue and nonrevenue freight traffic on Class I and II railroads.

<sup>b</sup> NATO totals include only data for the US and those NATO countries that are listed under "Other NATO Countries."

<sup>c</sup> Revised plan for 1965. The original plan was for 1,800 billion to 1,850 billion metric ton-kilometers and was reached in 1964.

<sup>d</sup> Including performance of railroads owned jointly by Hungary and Austria and performance by narrow-gauge railroads for "limited public use."

<sup>e</sup> Including service traffic.

<sup>f</sup> Full carloads only. The data exclude military traffic.

<sup>g</sup> Government railroads only.

<sup>h</sup> Data are for the year beginning 1 April of the stated year.

<sup>i</sup> Including military and government traffic.

<sup>j</sup> Excluding livestock.

<sup>k</sup> Excluding express parcels.

<sup>l</sup> Data are for the year beginning 1 July of the previous year.

<sup>m</sup> Excluding Northern Ireland. Data include service traffic.

<sup>n</sup> Including data for the Saar.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Data include all railroad locomotives of 1,000 horsepower or more. Because of the lack of consistency, totals for the NATO and the Communist countries have been omitted. For data on diesel and electric locomotives, see Table 174, p. 182 and Table 175, p. 183.

<sup>b</sup> Data include locomotive units, delivered domestically and exported, that are substantially new but also may include a limited amount of used equipment. Data for gas turbine locomotive units, which are included in the total for the US but are not included in Table 174, p. 182, and Table 175, p. 183, are as follows: 1958, 25; 1959, 7; 1960, 12; 1961, 8; 1962, 1; 1963, 0; and 1964, 0.

<sup>c</sup> Locomotives for government railroads only.

<sup>d</sup> Data refer to locomotives added to the operating stock by the British Transport Commission and to exports.

<sup>e</sup> Data differ from those presented in the previous *Handbook*, in which data included large opencast mine locomotives and small mine and industrial locomotives.

\* An asterisk indicates that the data are unclassified.

<sup>a</sup> Including ships of 1,000 gross register tons (GRT) or more. Data for the NATO countries include all combination passenger and cargo ships, whereas those for the Communist countries exclude passenger ships that have small cargo capacities.

<sup>b</sup> Data are as of midyear.

<sup>c</sup> Including both private and government-owned fleets but excluding merchant ships owned by any military force.

<sup>d</sup> Unless otherwise indicated, data are as of the end of the year.

<sup>e</sup> Excluding the Caspian Sea fleet.

<sup>f</sup> Including a varying number of ships flying the Polish flag but under the control of the Chinese-Polish Shipbrokers Corporation. At the end of 1964, there were 19 of these ships, totaling 158,514 GRT.

<sup>g</sup> Including coastal passenger ships.

<sup>h</sup> Except for 1960, data include an unknown number of ships jointly owned by the Chinese-Albanian Joint Stock Shipping Company.

Gross national product, selected NATO countries .....	6	Land utilization .....	84
Hard coal .....	117	Lead .....	137
Highway freight traffic .....	171, 172	Less developed countries, Communist aid .....	75
Hogs, inventory of .....	100	Less developed countries, total aid .....	76
Housing construction .....	162	Lignite and brown coal .....	118
Housing construction per capita .....	152	Livestock, inventory of .....	99, 100
Hungary, economic data .....	45	Locomotives, diesel, production of .....	182
Hydroelectric power .....	123	Locomotives, electric, production of .....	183
Imports, USSR .....	66	Locomotives, inventory of .....	188
Imports, USSR, chemical equipment .....	73	Locomotives, mainline, production of .....	181
Imports, USSR, from Eastern Europe .....	68	Long-distance telephone calls .....	145
Imports, USSR, from industrial West .....	70	Machine tools, metalcutting .....	160
Imports, USSR, from less developed countries .....	71	Machine tools, metalforming .....	160
India, international comparisons and economic data .....	30, 31	Magnesium, primary .....	140
Industrial crops .....	101, 102	Mainline diesel locomotives, production of .....	182
Industrial production, Eastern Europe .....	9	Mainline electric locomotives, production of .....	183
Industrial production indexes .....	8	Mainline locomotives, inventory of .....	188
Industrial production indexes, official gross .....	11	Mainline locomotives, production of .....	181
Industrial production indexes, USSR .....	13	Manganese ore .....	129
Industrial production, US and USSR .....	7	Manufactured items .....	152-166
Inland transport, total .....	168	Maritime cargo ships, construction of .....	178
Inland water freight traffic .....	173, 174	Maritime tankers, construction of .....	179
International comparisons, France .....	28	Meat .....	95
International comparisons, India .....	30	Merchant fleet, inventory of .....	191
International comparisons, Italy .....	32	Metalcutting machine tools .....	160
International comparisons, US .....	26	Metalforming machine tools .....	160
International comparisons, USSR .....	40	Metallurgical coke .....	119
Investment and defense, USSR .....	18	Metallurgical equipment .....	142
Investment, gross fixed, USSR .....	15	Metals, ferrous and ferroalloying .....	126-133
Iron ore .....	128	Metals, nonferrous .....	134-141
Iron, pig .....	127	Military aircraft, production of .....	164, 166
Italy, international comparisons and economic data .....	32, 33	Military and civilian goods, USSR .....	16
		Military and economic aid .....	75-78
		Military end items .....	164-166
		Military expenditures and defense budget, USSR .....	17
		Military expenditures, USSR .....	19
		Milk .....	96
		Mineral fertilizer .....	111
		Mineral fertilizer, nutrient content .....	110
		Minerals and metals .....	126-142
		Molybdenum .....	132
		Mongolia, economic data .....	53
		Motors, electric .....	161

National product, gross	2-6, 12	Railroad freight cars, production of	184
Natural gas	122	Railroad freight traffic	169, 170
Natural rubber	113	Rates of exchange, Communist countries	81
Naval ships, construction of	165	Rates of exchange, NATO countries	82
Nickel, refined	130	Rayon and acetate fabrics	158
Nonagricultural labor force	25	Rayon yarn and synthetic fibers	159
Nonferrous ores and metals	134-141	Receivers, radio, in use	150
North Korea, economic data	50	Receivers, radio, production of	148
North Vietnam, economic data	51	Receivers, television, in use	150
Oats, barley, and corn	92	Receivers, television, production of	149
Ocean freight traffic	175	Refined benzol	112
Oil, crude	120	Refined copper	134
Ore, iron	128	Refined nickel	130
Ore, manganese	129	Refined zinc	138
Ore, tungsten	133	Refrigerators	153
Ores and metals, ferrous and ferroalloying	126-133	Research and development, military, USSR	19
Ores and metals, nonferrous	134-141	Rice	93
Passenger automobiles in use	152	Rubber and rubber products	113, 114
Passenger automobiles, production of	185	Rubber, natural	113
Passenger-kilometers flown by scheduled air- lines	176	Rubber, synthetic	113
Payments deficit, USSR	79	Rubber tires	114
Performance, communications	144-146	Rumania, economic data	47
Performance, transportation	168-177	Scheduled airlines, passenger-kilometers flown	176
Persons employed on farms	152	Ships, fishing, construction of	180
Persons supplied per farm worker	152	Ships, maritime cargo, construction of	178
Petroleum exports, USSR	72	Ships, naval, construction of	165
Petroleum pipeline transportation	177	Soda ash	108
Petroleum products	121	Soda, caustic	109
Pig iron	127	Space systems expenditures, USSR	19
Pipeline transportation, petroleum	177	Sponge, titanium	141
Plastics	111	State budget, USSR	14
Poland, economic data	46	Stations, TELEX network	146
Population and country tables	22-55	Steel, crude	126
Population	22	Students from less developed countries	77
Potatoes	94	Sugar	97
Power, electric	123	Sulfuric acid	106
Power equipment	124	Synthetic ammonia	107
Power, hydroelectric	123	Synthetic fibers and rayon yarn	159
Primary aluminum	135	Synthetic rubber	113
Primary energy	116	Tanker fleet, inventory of	192
Primary magnesium	140	Tankers, maritime, construction of	179
Primary tin metal	139	Technicians, Communist, economic and mili- tary	78
Processed foods and fish catch	95-98	Telegrams, number sent	145
Producer goods, production of	160, 161	Telephone calls, long-distance	145
Radio receivers in use	150	Telephones in use	144
Radio receivers, production of	148	Television receivers in use	150
Railroad freight cars, inventory of	189	Television receivers, production of	149
